THE CONCEPT

The pursuit of perfection characterizes the CXI SPA Lido Palace that, since 2011, relies on the extremely properties of cutting-edge private label cosmeceutical products and the latest beauty technology.

The desire to always be ahead of our time and extend our offer to excellence has given rise to CXI Medical Beauty, a SPA concept born on the shores of Lake Garda and dedicated to pro-aging, the innovative path to the natural well-being that follows every stage of life. The program, created to highlight one's own age and awareness, instead of hiding or concealing it, is the idea that led to the meeting between the CXI SPA and Dr. Ezio Costa, giving rise to this unexpected concept that revolutionizes the idea of combatting the signs of aging.

The face as a mirror of the inner self and a means of dialogue with the world is the basis of this experience to improve the individual and his/her self-esteem.

A sincere smile that transmits a deep satisfaction that is reached when you look in the mirror and the image is seen as a reflection to inner feelings, creating a dialogue with the world as that conveys a profound wellness, which is reached when the image reflected in the mirror meets your expectations: this is the goal of the newly-created team of specialists in CXI Medical Beauty Centre.

THE MEETING

The CXI is pleased to have found Dr.Ezio Costa, professor and coordinator of the master's level II "Aesthetics of oral and perioral tissues in Dentistry" and "course in appearance of the perioral tissues" at the Universities of Padua and Genoa, as the international-level figure entrusted with the treatment of their guests. Graduated in Medicine and Surgery at the University of Verona, after specializing in Aesthetic Medicine and Dentistry, graduated with a diploma in "Consultant and expert in aesthetic medicine since 1985." He is also a promoter of a multidisciplinary approach to the aesthetics of the face in Italy and abroad through courses, conferences, articles and videos targeted to dentists, the "smile specialists" that, due to the nature of their business, have a particular predisposition to the care of the entire face.

Founder and president of POIESIS (Perioral and Oral Integrated Esthetic Sciences International Society), he has designed and supervised the project "Beauty with Safety."

In collaboration with Dr.Ezio Costa is Dr. Claudio Dutto, surgeon-dentist, expert in orthodontics and specialized since many years in the "aesthetics of the smile."

THE METHODOLOGY

THE PROJECT

Where the boundary between medicine and aesthetics is reduced more and more, the CXI Medical Beauty treatments were created through intensive study and research that combine all the fundamental techniques needed to achieve immediate and long lasting results.

An alliance between doctors and aesthetic technicians, constituting a unique opportunity to start to really like yourself, in a warm and prestigious setting, where the entire experience is undertaken in total privacy.

THE DIALOGUE

Every path to wellness is composed of a series of treatments based on specific needs.

The initial phase involves a preliminary assessment, where Dr. Costa and Dr. Dutto analyse the expectations and needs of the person sharing the goal to consolidate together:

The dialogue opens with a health and beauty check-up where underlying causes of skin aging are uncovered and concludes with the identification of the most appropriate actions to rebalance each individual.

MEDICAL

PRO-AGING MEANS TO CHOOSE HOW TO AGE, RESTORING HARMONY TO THE SHAPE OF YOUR FACE. TO ACHIEVE THIS ALL THE EQUIPMENT AND MEDICAL TREATMENTS HAVE BEEN ESPECIALLY SELECTED AND ARE CAREFULLY TAILORED TO THE NEEDS OF EACH INDIVIDUAL, ENSURING MAXIMUM ATTENTION TO EVERY DETAIL. MOLECULES

HYALURONIC ACID

Hyaluronic acid is a natural polysaccharide present in all living organisms.

It is a major component of skin and connective tissue and plays an important role in ensuring tissue hydration, while protecting it from excessive stress and tension.

Hyaluronic acid injection for aesthetic use (dermal filler) is a synthetic, reabsorbable and is completely inert and free from the risk of allergic-type reactions.

With hyaluronic acid you can:

- fill in wrinkles
- correct frown lines, glabellar lines, nasal furrows, nasolabial folds, commissures, marionette lines, perioral wrinkles
- restore tone, volume, firmness and structure to the skin
- correct proportions and volume of the cheekbones, chin and jaw contour

BIO-REVOLUMETRY

Bio-revolumetry treatment is a cutting edge treatment with hyaluronic acid of the new generation, which allows the complete rejuvenation of the face by correcting volume and the restructuring of the tissues. The particular composition of three different molecular weights and concentrations of hyaluronic acid injected into the sub-cutaneous layer; to improve skin and tissues in terms of support, elasticity, hydration, firmness, and stimulation of cell renewal.

BOTOX

Botox is a purified natural protein successfully used in medicine for over 20 years. Applied with precision in small quantities, it modulates the strength of the muscles related to facial expression. This technique reduces and eliminates wrinkles on the face that appear as a result of strong expression muscle activity. The effects of Botox gradually decrease until it disappears after 5-6 months of treatment.

With this treatment you can:

- Eliminate horizontal and vertical wrinkles of the forehead
- Eliminate small wrinkles on the outer sides of the eyes (crow's feet)
- Eliminate small wrinkles of the upper lip (barcode)
- Reduce muscle tension that causes headaches
